

International Symposium: **The evolutionary history of the human face**

Madrid, September 13, 2016

CV

CHRIS STRINGER

Dr. Stringer has worked at The Natural History Museum since 1973, and is now Research Leader in Human Origins and an FRS. His early research was on the relationship of Neanderthals and early modern humans in Europe, but through his work on the Recent African Origin theory of modern human origins, he now collaborates with archaeologists, dating specialists and geneticists in attempting to reconstruct the evolution of modern humans globally. He has excavated at sites in Britain and abroad, and is currently co-directing the Pathways to Ancient Britain project, funded by the Calleva Foundation. He has published over 200 papers and several books including *The Origin of Our Species* (2011) and *Britain: One Million Years of the Human Story* (2014, with Rob Dinnis).
