CV

JOHN SUTHERLAND

John D. Sutherland studied chemistry at Oxford, and then spent a spell as a Kennedy Scholar at Harvard. Upon return to the UK, he carried out his doctoral work with Jack Baldwin at Oxford, and then stayed in Oxford as a Lecturer in Organic Chemistry. In 1998 he took a chair at Manchester, and in 2010 moved to the MRC Laboratory of Molecular Biology in Cambridge. He is interested in chemistry associated with the origin of life. He has published more than 100 articles in several top journals including *Nature*, *Nature Chemistry*, *Angewandte Chemie* and *Journal of the American Chemical Society*. He has been awarded with The Max Tishler Prize Lectureship (Harvard University, USA, 2009), The Royal Society of Chemistry Tilden Prize (2011), The Royal Society Darwin Medal (2014), and has been Co-winner of the Origin of Life Challenge (2012).
