

Simposio Internacional: Evolución por cooperación. La obra de Lynn Margulis (1938-2011)

International Symposium: *Evolution by cooperation. The work of Lynn Margulis (1938-2011)*

Madrid, 12 y 13 de noviembre de 2012

Madrid, November 12-13, 2012

Juli Peretó

Tenured Professor of Biochemistry and Molecular Biology at the University of València, researcher at the Evolutionary Genetics Unit, Cavanilles Institute for Biodiversity and Evolutionary Biology (València) and Member of the Institute for Catalan Studies (Catalan Academy of Science and Humanities). His research interests include the evolution of metabolism, the minimal genome concept, and the history of ideas on the natural origin and the artificial synthesis of life. He teaches metabolism with an evolutionary flavor to biologists, biochemists and biotechnologists. Former Secretary of the International Society for the Study of the Origin of Life (ISSOL-The International Astrobiology Society) and current Second Vice President of ISSOL for the term 2011-2014. His most recent book, coauthored with A. Moya, is *Simbiosis: seres que evolucionan juntos* (Síntesis, Madrid, 2011).
