

Simposio Internacional: Evolución por cooperación. La obra de Lynn Margulis (1938-2011)

International Symposium: *Evolution by cooperation. The work of Lynn Margulis (1938-2011)*

Madrid, 12 y 13 de noviembre de 2012

Madrid, November 12-13, 2012

Antonio Lazcano

Born and educated in Mexico, Antonio Lazcano was trained both as an undergraduate and graduate student at the National Autonomous University of Mexico (UNAM, Mexico City), where he is currently head of a research group devoted to the study of early cellular evolution. He has studied the origin and early evolution of life for over 30 years and is the author of several books published in Spanish, including *The Origin of Life*, with over 800,000 copies sold. His current research interests include the chemistry of the origin of life, and the use of phylogenomic databases to reconstruct early stages of cell evolution. He was served twice as the President of the International Society for the Study of the Origin of Life (ISSOL, the first Latin American scientist to occupy this position. He is also the first Latin American scientist that has chaired the Gordon Conference on the Origins of Life, and has served on a number of advisory boards, including ones for NASA and other international organizations. Other distinctions and awards include his appointment as Distinguished Professor of the University of Henan (China) the Golden Medal for Biological Research (Puebla, 1990), the Medal of the Founders of the Universidad San Francisco de Quito (2005), the Premio Universidad Nacional en Investigación en Ciencias Naturales (UNAM, 2007), the *First Francesco Redi Medal of Astrobiology* in Florence, Italy, and the *Honoris causa* degree from the University of Milano, Italy (2008).
