

INTELIGENCIA ARTIFICIAL APLICADA A LA BIOMEDICINA

Fundacio Ramon Areces, Madrid

Feb 7, 2019

# Soft Robotics for Intuitive Invisible Interactions

Jamie Paik

Reconfigurable Robotics Laboratory

EPFL

# Paradigm shift in robotic design

## industrial environment

- Highly predictable
- Programmable

### Augmented performance:

- Force
- Speed
- Precision

## real-world environment

- Highly unpredictable
- Random tasks and uncertainties

### Augmented interactivity:

- Adaptability
- Reconfigurability
- Safety

# Paradigm shift in robotic design: Is anthropomorphic robot the answer ?

# Paradigm shift in robotic design: Is Anthropomorphic robot the answer ?

# What are soft pneumatic actuators?

# Soft Pneumatic Actuator (SPA) modules

Robertson & Paik, *Science Robotics* (2017)

“Soft Exo for Hand Rehabilitation with Embedded Soft Sensors”

# Portable vest for assistance

a.) The soft robotic vest.  
Actuators marked 1-6

Compressor +  
battery in the  
backpack

Pressure  
reservoirs

Flexible exo-  
spine

b.) Portable pneumatic supply system  
for powering wearable soft robots

For elderlies and occupational hazard :  
Prevention of fall, heavy load assistance, posture assistance

# Portable vest for assistance

## Kinesthetic feedback

a.) The soft robotic vest.  
Actuators marked 1-6

b.) Portable pneumatic supply system  
for powering wearable soft robots

For elderlies and occupational hazard :  
Prevention of fall, heavy load assistance, posture assistance

# Soft kinesthetic assistance applications

## Balance Assistance

- up to **112 N** force or **18 Nm** moment for balance augmentation

## Gait Correction

- $\pm 4^\circ$  Angular displacement
- **1.3 Hz** bandwidth to support weakness or compensate for asymmetric *during* walking

## Sports Training

- Multimodal, quantified feedback to correct **form** and **posture**
- Integrated with low profile vibrotactile feedback **SPA Skin**

# Soft kinesthetic assistance applications

## Subtle movements?

### Balance Assistance

- up to **112 N** force or **18 Nm** moment for balance augmentation

### Gait Correction

- $\pm 4^\circ$  Angular displacement
- **1.3 Hz** bandwidth to support weakness or compensate for asymmetric *during* walking

### Sports Training

- Multimodal, quantified feedback to correct **form** and **posture**
- Integrated with low profile vibrotactile feedback **SPA Skin**
