BIO

Carsten Sørensen

Dr **Carsten Sørensen** is a Reader (Associate Professor) in Digital Innovation at LSE's Department of Management (carstensorensen.com). Since the 1980s he has researched the digital transformation of business and work, for example through mobile technology (enterprisemobilitybook.com), and the innovation dynamics of mobile infrastructures and -platforms (digitalinfrastructures.org).

He developed LSE's first on-line cryptoasset and block-chain course (<http://bit.ly/2RMbmYS>). Carsten has published widely within Information Systems since 1989 (scholar.carstensorensen.com), for example in MISQ, ISR, JMIS, ISJ, JIT, Information & Organization, The Information Society, Computer Supported Cooperative Work, and Scandinavian Journal of Information Systems. Carsten also has extensive experience managing national, EU, and industry research grants with research grants totalling over £3 million. He has for a number of years been engaged in assisting and assessing digital start-ups and has for 25 years been actively engaged in academic consultancy and executive education with a broad range of organisations – IMF, SAP, Microsoft, Google, PA Consulting, Huawei, Orange, Vodafone, Intel, GEMS, to name just a few.
